

Frontiers of Chemical Science and Engineering

Aims & Scope

Frontiers of Chemical Science and Engineering, a refereed international journal, seeks to provide a platform for the publication of peer-reviewed papers to promote rapid communication and academic exchange between researchers in the field of chemical science and engineering. It aims to reflect significant advances currently being made worldwide in a broad scope of chemical science and engineering. The journal publishes review articles, research articles, rapid communications and views & comments by individual researcher

and research groups.

The journal covers nearly all main branches of chemical science and engineering, including these core areas: catalysis and reaction engineering, clean energy, functional material, nanotechnology and nanoscience, biomaterials and biotechnology, particle technology and multiphase processing, separation science and technology, sustainable technologies and green processing.

The journal is strictly peer-reviewed and only accepts original submissions in English.
